The first international workshop 'THE NEW LABOUR MARKET CHALLENGES AND OPTIONS FOR SOCIAL PROTECTION' takes place in the context of the EU-funded MOSPI (Modernizing social protection system in Italy) project and coordinated by INAPP. Starting from the results of INAPP report, the workshop aims at gathering high-level scholars and policy makers to discuss the current transformation affecting the EU and Italian labour markets and social protection systems. The focus is on the socioeconomic impact of digitalization, aging and changing labour markets, on labour market dynamics and in particular of non-standard employment, self-employment and platforms workers, and for their access to the social protection system.
